

# *Rhythm Dominoes*

**Level 2/3**

## **How to play Rhythm Dominoes**

- Mix up the dominoes and divide them between the players.
- The youngest player goes first and places a double domino on the table.
- The second player places a matching domino next to the domino on the table, connecting the two. Players may match with a note, number, or rhythm pattern.
- Two numbers (inside the colored circles) cannot be matched together.
- If a player doesn't have a match, he/she skips a turn.
- Continue taking turns placing dominoes on the table, snaking them around the table.
- The first player to run out of dominoes is the winner. If neither player has a match, the player with the fewest remaining dominoes is the winner.

**For more fun and longer game play, print out two pages of dominoes!**
