Rhythm Stories - Use % time

When you are practicing, try following these steps:

- (2-5 min) Play your scale & triads (make sure you use the right fingers and play evenly, if you don't get it right, try it again, practice until you get it right)
- (5 min) Start with the hardest (or newest) song. Try two measures RH/LH/then HT. Once that goes well, add 2 more measures or review yesterday's work (5 min or less) Play the song we've had the longest. Listen for dynamics, even tempo and ensure you are using the right fingers. If you can play the whole 3. thing in less than 1 minute, do it 2 or 3 times!
- (5 min) Work on the other song (if we have one) or play an old song for fun! Also a good time to revisit something that might need more attention (a triad, scale, BI page etc.)
